REQUEST FOR PROPOSALS

Request for PPE SOLICITATION #CWH20-02

This Request for Proposals ("RFP") is issued in accordance with the Utah Procurement Code and applicable administrative rules of the Utah Administrative Code. If any provision of this RFP conflicts with the Utah Procurement Code or Utah Administrative Code, then the Utah Procurement Code or Utah Administrative Code will take precedence.

Purpose of this Solicitation

The purpose of this RFP is to enter into a contract to provide: PPE of any kind to the State of Utah during the COVID-19 Outbreak to help prevent the spread of COVID-19 including face masks, sanitation materials and supplies, and any materials the State can review.

Multiple Contract Award Anticipated

It is anticipated that this RFP will result in multiple contract awards. The methodology or formula that will be used to determine the number of contract awards is qualified vendors that meet the State of Utah requirements.

Future Procurements

The State of Utah reserves the right and may reopen this solicitation, or create a new solicitation if it determines there may be more competition for the procurement item than when the original solicitation was posted.

Length of the Contract

The contract resulting from this RFP will be for the period of COVID-19 Outbreak.

Response:

Please respond to this solicitation by emailing christopherhughes@utah.gov with a list of PPE items that you can provide to the State of Utah. In your email you should address the following:

- In what state is your company incorporated?
- Has your company sold any PPE to any other public entity?
- If so, please provide some references.
- If you have lead times or a catalog could you provide them to me?
- Where are you getting your product from?
- If China, what is your relationship with factory making the PPE?
- Are the necessary PPE FDA CERTIFIED?
- "If you provide a mask, what are the size and strap configurations?
- Are the masks ear loops or over the head configuration."
- How long have you been in the business of providing PPE?

We are following the current FDA and CDC updates for PPE product requirements to make sure that the products we purchase meet the FDA, NIOSH, NON -NIOSH, AAMI/ASTM regulatory guidance.

We will need the following documentation depending on the PPE you have available before any decisions at State of Utah can be made for all non-US products:

Option 1:

- FDA 510K

- FDA owner number may be helpful, however will need to be verified for approvals associated with the manufacturer
- The State of Utah will be validating this information through the FDA

Option 2: If no proof of an FDA 510K, **proof of ALL of the below are required via PDF or high-quality images**

- Products
- Packaging and labeling
- Country of origin and testing performance certificates
- Expiration dates
- Sizes and model number by the product manufacturer
- AAMI level status identified on the product/packaging for isolation and surgical gowns
- Surgical or procedure mask must have the AAMI/ASTM status identified on the product/packaging
- Reference number or the IFU (Instructions for use)
- Reference numbers proving **NIOSH TC certification for N-95 masks**
 - Ear-looped N-95 products will not meet fit testing so no ear-looped products only full head double elastic masks
 - The State of Utah will be validating this information through the FDA and NIOSH
 - **For Foreign Vendors with NON-NIOSH of N95 masks** we will need the requirements as in the FDA Emergency Use Approval letter [LINK HERE](#)
 - The FDA has a fast track for vendors meeting requirements as stated in the letter if you your suppliers would like to register their markings and performance documents
- AAMI /ASTM level for the product number for surgical grade products
- For non-perfumed hand sanitizers, protective masks, and protective gowns please include specifications
 - Preferred: Gel type sanitizers in 500 ml bottles

Very helpful: physical samples are very helpful but not required. Please provide the requested information in one email response back.

Additional Questions:

- What level are your surgical gowns?
- Do your surgical masks meet AAMI/ASTM level fluid protection?
- For N95 masks what is the TC number?

If you are providing N95 or KN95 mask, please answer these questions

- Is it a FDA registered product/facility?
- What is their production capacity?
- Where is the product located (domestic or off-shore)?
- What is their lead time on delivery?
- Can they manage shipping and logistics?
- Price
- Photos

Please also see the attached document to understand our review.

Please include certificates from the factory you will use.

The State of Utah will review each email received and respond to the emails that the State of Utah believes provide it with the best options for PPE.

Prerequisites

- ★ 1. Offerors are encouraged to review this RFP prior to the deadline to submit a proposal, even if a proposal has been submitted, in case an addendum has been issued by the issuing procurement unit.
- ★ 2. All questions must be submitted through SciQuest during the Question and Answer period.
- ★ 3. The State of Utah Division of Purchasing does not guarantee any purchase amount under an awarded contract.
- ★ 4. If it is determined to be in the best interest of the Conducting Procurement Unit, interviews and presentations may be held at the option of the State.
- ★ 5. Offerors may request that part of its proposal be protected by submitting a Claim of Business Confidentiality Form. See the Buyers Attachment section.
